Course From Jspiders BTM

PROJECT

Hospital Management System

- This Hospital management app simplifies the patient registration process, manages hospital employees and Med orders. With its user friendly interface and robust back-end, the app is an ideal solution for hospitals and healthcare providers looking to modernize their operations.
- The Hospital Management App is a web application developed using Spring Boot and REST API technologies.

E-Help Application

- This application design for storing the customer details the main purpose of this application is for Storing the customer Query for further response regarding the respective Query . And we can use it for different sector like education, e- commerce, hospital etc.
- We build this project by performing curd Operation .Our Project uses java-Script, HTML, CSS, REACT and we uses Json-server to storing the data.

SKILLS

JAVA

OOPS | Inheritance | Polymorphism |
Abstraction | Encapsulation |
Interface |Exception|
Multithreading | Collection | JDBC

J2EE

Servlets | GenericServlet |
HttpServlet | UI/Form Data | Servlet
Lifecycle

HIBERNATE ORM | Hibernate Annotations |
Mapping | SessionFactory | Session |
Configuration | Transaction | CRUD
operation | Hibernate Query
Language

SPRING

IIOC | Dependency Injection |
AutoWiring | Spring Core | Spring
Context | Spring MVC | Spring AOP |
JPA | REST API

SQL

SQL Queries | DDL | DQL | DML | TCL |
GROUPBY | Joins | Normalisation

WEB

HTML | CSS | Bootstrap | JavaScript |
React.js
